SUMMARY

Software quality engineer with a background in enterprise hardware deployment, technical support, and software validation. B.S. Software Engineering, Western Governors University (2026). Builds automated test coverage in Playwright and xUnit; comfortable with REST API testing, SQL, and the Angular/TypeScript stack. AWS Cloud Practitioner, CompTIA A+/Network+/Project+, and ITIL 4 certified.

TECHNICAL SKILLS

Test & Quality: Playwright (cross-browser: Chromium, Firefox, WebKit), xUnit, test case design, defect reporting, deployment validation, unit and integration testing, REST API testing

Languages: TypeScript, JavaScript, C#, SQL, HTML, CSS; Python (familiar)

Frameworks & Platforms: Angular 19, .NET, .NET MAUI, Node.js, RxJS, ASP.NET, Firebase, SQL Server, MySQL, SQLite

Tools & Infrastructure: Git/GitHub, GitHub Actions, GitHub Pages, Visual Studio, VS Code, Postman, AWS, REST APIs

Practices: Agile/Scrum, CI/CD, object-oriented design, software design patterns

SELECTED PROJECTS

Interactive World Map — Angular SPA with Playwright E2E Suite

2026

Angular 19 · TypeScript · World Bank REST API · Playwright · GitHub Pages Live demo · Open source

- Architected an Angular 19 single-page application consuming the World Bank Open Data REST API via HttpClient and RxJS observables; rendered an interactive SVG world map with hover-driven country selection across 200+ ISO-coded country paths.
- Identified and resolved a null-value handling defect in the population indicator endpoint, where recent years returned null records; implemented defensive parsing to surface the latest non-null data point with explicit “No data available” fallback for territories without coverage.
- Deployed to production via GitHub Pages with a base-href-configured Angular build; debugged and resolved asset path resolution and HTTPS mixed-content issues uncovered in production-only runtime conditions.
- Integrated Playwright into the same codebase, resolving a TypeScript configuration conflict between the Angular compiler and the Playwright test runner; isolated the test layer with a dedicated e2e/tsconfig.json and an explicit exclude override on the main project configuration.
- Configured cross-browser test execution across Chromium, Firefox, and WebKit; verified end-to-end behavior against the live production deployment; designed test architecture to scale toward hover-event mocking, API response interception, and edge-case coverage for null-value handling.

Term Tracker — WGU Capstone

2025

C# · .NET MAUI · xUnit · Firebase

Repository private per academic policy

- Built a cross-platform mobile application with full CRUD operations for academic term, course, and assessment tracking; implemented local notifications and an instructor contact module beyond base requirements.
- Authored a comprehensive xUnit test suite covering data operations, notification logic, and edge cases including invalid date ranges and missing assessment fields.
- Extended application scope with a search feature and reporting module; delivered against documented academic and technical specifications with a recorded technical demonstration.

PROFESSIONAL EXPERIENCE

Deployment Field Technician — HP Inc.*Feb 2023 – May 2026**Louisville, KY*

- Performed systematic break-fix diagnostics on HP printers, POS systems, and workstations across retail, hospitality, and government sites; isolated root cause, documented findings, and resolved issues in compliance with HP quality standards.
- Validated each deployed unit against documented deployment specifications prior to customer turnover, functioning as the final QA checkpoint on every installation.
- Documented defects, environmental conditions, and deployment outcomes in structured records; produced reproducible diagnostic notes used by downstream support and engineering teams.
- Operated independently across multi-site logistics, retail, and government deployments at scale; trusted for high-visibility installations with limited rework tolerance.

Electronics Repair Technician — LRD Kroger*May 2022 – Jan 2023**Louisville, KY*

- Reimaged and configured Zebra tablets and handheld scanners for store-wide technology rollouts; documented all devices against deployment specifications prior to release.
- Diagnosed hardware failures and performed component-level replacements; maintained operational inventory for an active retail technology environment.

Repair Agent / Data Recovery Specialist — Best Buy Geek Squad*Jan 2021 – Jan 2022**Louisville, KY*

- Executed diagnostics and validated repair outcomes across 10+ laptops and PCs daily; documented findings clearly in service records.
- Performed data recovery under hardware failure conditions using industry-standard tooling; verified data integrity post-recovery.

Technical Support Representative — Spectrum*Dec 2018 – Jan 2021**Louisville, KY*

- Documented complex technical tickets with thorough reproduction steps and structured escalation notes for Tier 2 and Tier 3 review.

EDUCATION & CERTIFICATIONS

B.S. Software Engineering — Western Governors University*Conferred 2026**Remote · ABET-accredited**Focus: software quality assurance, unit testing, algorithms and data structures, software design patterns, object-oriented architecture, C# / .NET, TypeScript, Angular.***Certifications:** AWS Certified Cloud Practitioner · CompTIA A+ · CompTIA Network+ · CompTIA Project+ · ITIL 4 Foundation
